Kingston Order Picker License

Kingston Order Picker License - Order preparation operation or order picking as it is more normally known is a method utilized within warehouse operations and comprises personnel referred to as order pickers. The order picker's task is to collect and take articles in specific quantities in order to fulfill the client's orders previous to shipment. Order picking is an easy warehousing process. The effectiveness in which this particular job is accomplished could be directly related to the productivity of a supply chain. Thus, order picking is one of the most controlled logistic processes. Order picking falls within the category of the warehouse management system.

There are some specific kinds of order picking. The main types consist of: pick to box method, wave picking method, piece picking or picker to part method, zone picking method and sorting systems method.

The pick to box method consists of the order picker filling the box with the items from his or her station. The box then moves to other picking locations until the customer order is done. In this technique, there is no movement of the order picker personnel. In the wave picking method, the order pickers move all-around so as to collect the required things for numerous orders. The picker to part method or piece picking is similar where the order pickers or picker move to be able to collect the stuff required but for one order only.

In the sorting systems method, there is no movement of the order picking staff. Instead, the products are brought to her or him through an automated system like automatic storage or a conveyor system. In the zone picking method, each order picker is assigned to one specific area. They are responsible for just realizing order picking in this specified zone.
