

Clark Forklift

Clark Forklift Forklift Training - Performing globally, there are at this time 350,000 Clark forklifts and lift trucks in operation, with in excess of 250,000 of those operating in North America. Clark has five main lines of lift trucks across the world, making it one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 particular items fabricated for 20 distinctive brands of lift trucks and automated equipment. Your regional Clark Dealer is your total source for availability of all your components needs offered by Clark Totalift.

Clark's extraordinary Parts Distribution Facilities are conveniently stationed in Louisville, Kentucky, which serves both their consumers and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Motivated to supply the highest level of value and service to our customers, Clark remains on the leading edge when it comes to enhancing efficiency and benefiting performance.

Internationally, Clark has one of the most outstanding dealer support networks. With over 550 locations worldwide, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling market.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of refinement in the industrial equipment and automated forklift industry. This exceptional dedication to safety is now a customary feature on every forklift.

Clark's relentless goal to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift maker across the globe to be certified with the globally approved quality standard ISO 9001 for every one of their production plants. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental restrictions, thus placing them in a prevailing market position.

Lean Production

Clark has chosen the extremely economical and beneficial structure of "Lean Production" for its assembly facilities and application of resources. This system was developed to acknowledge the most successful approaches of production facility stewardship and ensuring maximum proficiency. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Engine Design

By working collectively, Clark's product suppliers and engineers communicate towards enhancing product effectiveness while minimizing costs. The new value engineering program combines innovative product growth and delivers superior client support and service within the industry.
